How to Use this Songbook & CD

- Play the CD as you follow along with the music
- Enjoy the simple melodies
- Hum and sing along with me as the melodies become familiar
- Sing with the children in your life

This project was inspired by the many adults I teach who wish to gain confidence in their singing voices so they can sing with their children. The songs are easy to learn. The music is included as a roadmap to help guide you. And remember!...It is not as important how you sing, but that you sing with children...they will remember you forever!...
